Why Aluminum Shingles?

Manufactured in Canada

Buchner Manufacturing Inc. (BMI) takes pride in the perfect balance of price and quality, which is why we manufacture the Bayview Roofing Collection in Canada.

Lasting Finish

The aluminum shingles are coated with Fluoron paint. This is a finish that is a field proven high-performance coating, that provides superior resistance to UV rays resulting in exceptional colour retention and reduced chalking giving the look of a beautiful roof for a lifetime.

Durable

The Bayview Roofing Collection aluminum shingle is an inorganic product and will not decompose, curl or crack. It does not rust, rot or burn making it an excellent long-term roofing choice. Stainless steel fasteners are used to fasten the shingle adding to the long-term durability of the roof.

Unique Design

With our unique airflow design this will prevent condensation and heat build-up. Combined with the reflective properties of the paint and the ability of aluminum to dissipate heat, the roof will absorb less heat and provide the homeowner with a cooler attic.

Complete Roofing System

Buchner Manufacturing offers a selection of preformed trims that are manufactured from the same materials and coated with the same finish, Fluoron. BMI also offers colour matching eavestrough system, soffit, fascia, and complementing trims and accessories.

Environmentally Friendly

The Bayview Roofing Collection aluminum shingles are an Eco-friendly choice as they are made from recycled metal, which saves resources and energy during manufacturing. The Bayview Roofing Collection can be placed over top of your old roof with the proper underlayment depending on the condition, which reduces the amount of waste going to landfills.

Snap On Roofing Profiles and Colours

Aluminum

The Snap On 7.5 is a Canadian manufactured product that is built to last with a Fluoropon, high performance paint coating that provides a superior resistance to UV rays, resulting in colour retention and reduced chalking. Since aluminum is a natural reflector, it helps keep cooling costs down, which is perfect for any residential or commercial

buildings. The aluminum Snap On 7.5 roofing also has a complete line of colour matched trims and accessories. Depending on the condition of the existing roof, this style of roofing can be installed directly over top, resulting in less waste going to landfill sites.

Steel

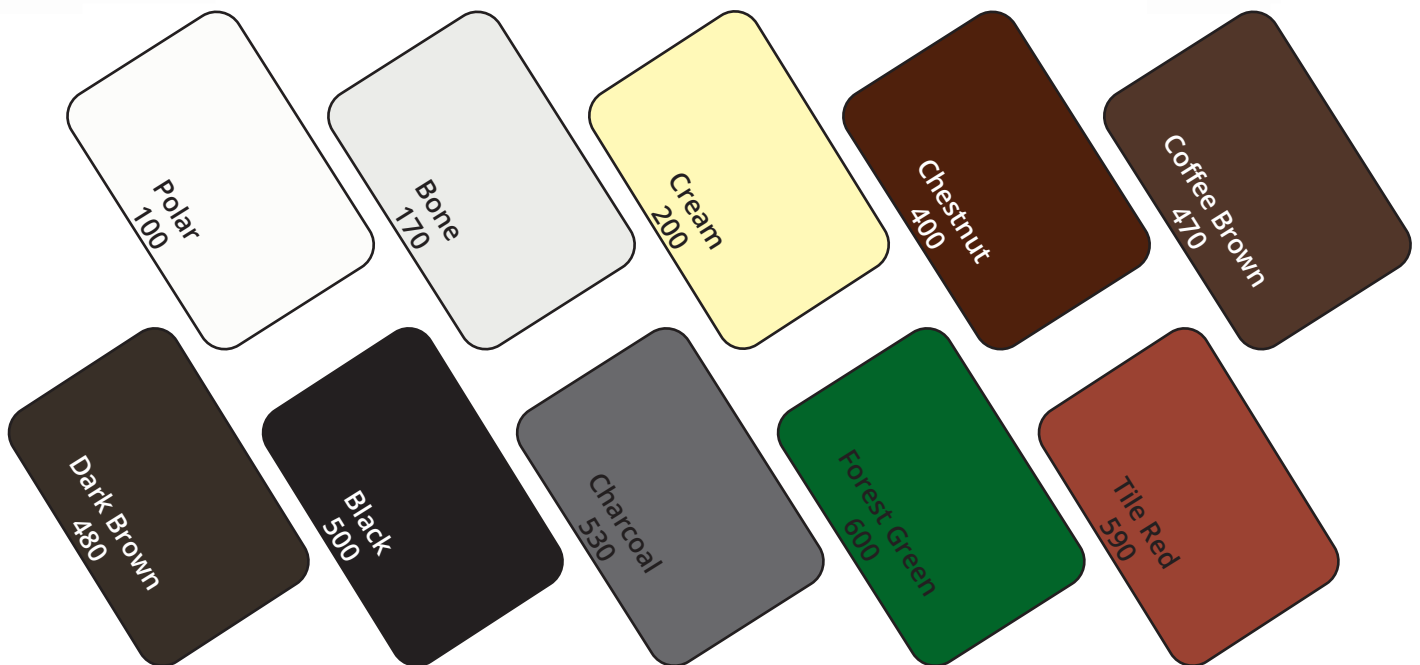

The Snap On 7.5 and the Snap On 11 profiles are available in 28ga steel, in 8'-24' custom lengths. Our embossed steel increases dent resistance, which helps on the install process and reduce potential damage from hail storms. We choose our superior siliconized polyester paint for our panels, as it is recognized in the industry for its remarkable colour and gloss retention as well as its exceptional chalk resistance. This style of roofing can be placed directly on top of your old roof, which in turn reduces the amount of waste going to landfill.

Why Metal Roofing?

Energy efficient

Keeps your home cooler in the summer reducing the cost of air conditioning.

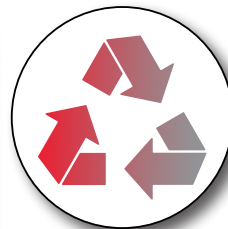

Environmentally friendly

No waste going to landfill, can be installed over the existing roof. (check your local building code)

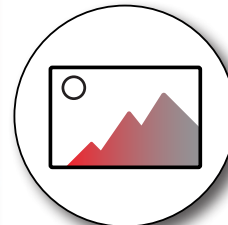

Resistant to harsh weather elements

Our aluminum shingle is CCMC 13613 R approved equivalent up to category 2 hurricane.

Recyclable at the end of it's lifetime

While your roof will last 50 years, if you do need to change it most of the material can be recycled.

Elegant appearance

Since it won't curl, crack, peel or rust your roof will look beautiful for years.

Complete eavestrough system

Our roofing systems are colour matched with our soffit and eavestrough.
