

maintenance-free

It's not just a roof – It's your home

If you're contemplating re-roofing, renovating or building new, then a metal roof by Vicwest should be strongly considered. A properly installed metal roof requires little maintenance, is not subject to rot, mold, high winds or insect infestation, won't burn, and will last decades longer than most other roofing alternatives. Our metal roofs contain recycled material and are 100 percent recyclable, and you'll never need to dispose of unfriendly shingles into a landfill again.

Investing in a metal roof is a choice you won't regret. Increased curb appeal, superior protection from the elements, maintenance-free, and better for the environment, make it the wise choice for your home.

With 6 unique profiles, available in a stunning array of matte and standard colours, we're confident the Vicwest Residential Metal Roofing Collection has a roof to complement your home and neighbourhood.
